

Hydrogen Hot Rod

H2 Training Guide

This H2 Training Guide is created to follow Stanley A Meyer's amazing life's work. We dedicate this guide to Stanley A Meyer and his brother Stephen Meyer.

And to all of the open source home builders and Hydrogen Hot Rodders who have sought out , found and shared these amazing technologies and teachings. RIP STAN

Index

Introduction

A lot of our Hydrogen Hot Rod home building work is based on Stanley A Meyer's Life's work. He and his brother Stephen developed over 20 to 30 years several versions of the technology from easy to complex to suit all engines. All worked and we show here most of them.

How to Use this Guide

- Assembly Version Map
- Hydrogen Hot Rod Examples
- Special Mention Vehicles
- Triangle Hot Rods & Custom Vehicles Technology
- Hot Rods & Custom Vehicles Technology

Introduction

Section 1

Section 1 cover the core circuits that Stanley Meyer and Stephen Meyer developed

- **START HERE** Single Tube Cell How to build how it works Section 4
- 9XD CIRCUIT How to build how it works Section 1
- 8XA CIRCUIT How to build how it works Section 1
- 9XB CIRCUIT How to build how it works Section 1
- 9XA CIRCUIT How to build how it works Section 1
- 10XA CIRCUIT How to build how it works Section 1
- Switches Gates Optocouplers How to build how it works Section 1
- EEC Electron Extraction CIRCUIT How to build how it works Section 1
- H BRIDGE How to build how it works Section 1
- Modern Circuit Drawings Section 1

Section 2

Section 2 covers the Bobbins and Transformers that Stanley Meyer and Stephen Meyer developed

- Bobbin Index Types Versions Basic Specification Section 2
- Bifilar Bobbin Choke How to build how it works Section 2
- Variac How to build how it works Section 2
- Voltarnator How to build how it works Section 2
- VIC Bobbin 1 How to build how it works Assembly Version 5 Section 2
- VIC Bobbin 2 How to build how it works Assembly Version 10 Section 2
- VIC Bobbin 3 How to build how it works Assembly Version 11 Section 2
- VIC Multi Spool Bobbin How to build how it works Section 2
- Rotary VIC 9XG Section 2

Section 3

Section 3 covers the GMS Vic Matix Cards and Assembly that Stanley Meyer and Stephen Meyer developed. Year in the making is shown wiring looms connection and the section of VIC , ECU/EMS , Injector control, Timing Control, Gas Processor controls, and Voltage Intensifier Matrix.

- What Parts make up the Vic Matrix [Section 3](#)
- VIC 101 Description [Section 3](#)
- VIC Circuit How to build how it works [Section 3](#)
- VIC SWITCH [Section 3](#)
- Analogue Voltage Generator How to build how it works [Section 3](#)
- Frequency Generator How to build how it works [Section 3](#)
- Digital Control Means How to build how it works [Section 3](#)
- Gas Feed back Circuit How to build how it works [Section 3](#)
- Resonance with VIC Matrix **VERSION** [Section 3](#)

Section 4

Section 4 covers the construction and operation of the Water Fuel Cells and Resonant Cavities that Stanley A Meyer created.

- START HERE** [Single Tube Cell How to build how it works](#) [Section 4](#)
- Plate Cell How to build how it works [Section 4](#)
 - Sphere Cell How to build how it works [Section 4](#)
 - 9 Tube Cell How to build how it works [Section 4](#)
 - 11 Tube Water Fuel Cell How to build how it works [Section 4](#)
 - 11 Tube Nano Water Fuel Cell How to build how it works [Section 4](#)
 - 11 Tube Tall Water Fuel Cell 8 inch 16 inch 18 [Section 4](#)
 - Flat Tube Water Fuel Cell Array How to build how it works [Section 4](#)
 - Flat Tube Nano Water Fuel Cell Array How to build how it works [Section 4](#)
 - Stacked Water Fuel Cell Resonant Cavity array [Section 4](#)
 - Connections for Tube Water Fuel Cells & Resonant Cavity Arrays [Section 4](#)

Section 5

Section 5 covers the construction and operation of the Gas Processor and Gas Gun Systems that Stanley A Meyer created.

- **READ THIS 2ND Engine Intake Gas Processor How it works** Section 5
- Gas Gun How to build how it works Section 5
- EGR Dampening Flame Speed Burn Rate How it works Section 5

Section 6

Section 6 covers the construction and operation of the EMS /ECU System section of the GMS Gas Management System Stanley A Meyer and Stephen Meyer created.

- ECU /EMS / GMS How to build how it works Section 6

Section 7

Section 7 covers the construction and operation of the Water fuel Tank and Delivery System section of the Buggy that Stanley A Meyer created.

- Water fuel Tank and Delivery System How to build how it works Section 7
- Steam Resonator Section 7

Section 8

Section 8 covers the construction and operation of the Injector System section of the Buggy that Stanley A Meyer created.

- [Injector System How to build how it works](#) [Section 8](#)
- [Mini Injector System How to build how it works](#) [Section 8](#)

Section 9

Section 9 covers the construction and operation of the Flash Arrestor System section of the GTNT Water Fuel and Gas Fuels that Stanley A Meyer created.

- [Safety System How to build how it works](#) [Section 9](#)
- [Quenching Tubes System How to build how it works](#) [Section 9](#)
- [Quenching Disc System How to build how it works](#) [Section 9](#)

Section 10

Section 10 covers the Complete System Running, Some Sneak Peaks at it running and various applications to give inspiration.

- [System Running](#) [Section 10](#)
- [Events and Show Case](#) [Section 10](#)
